Educational Software Solutions

About Us

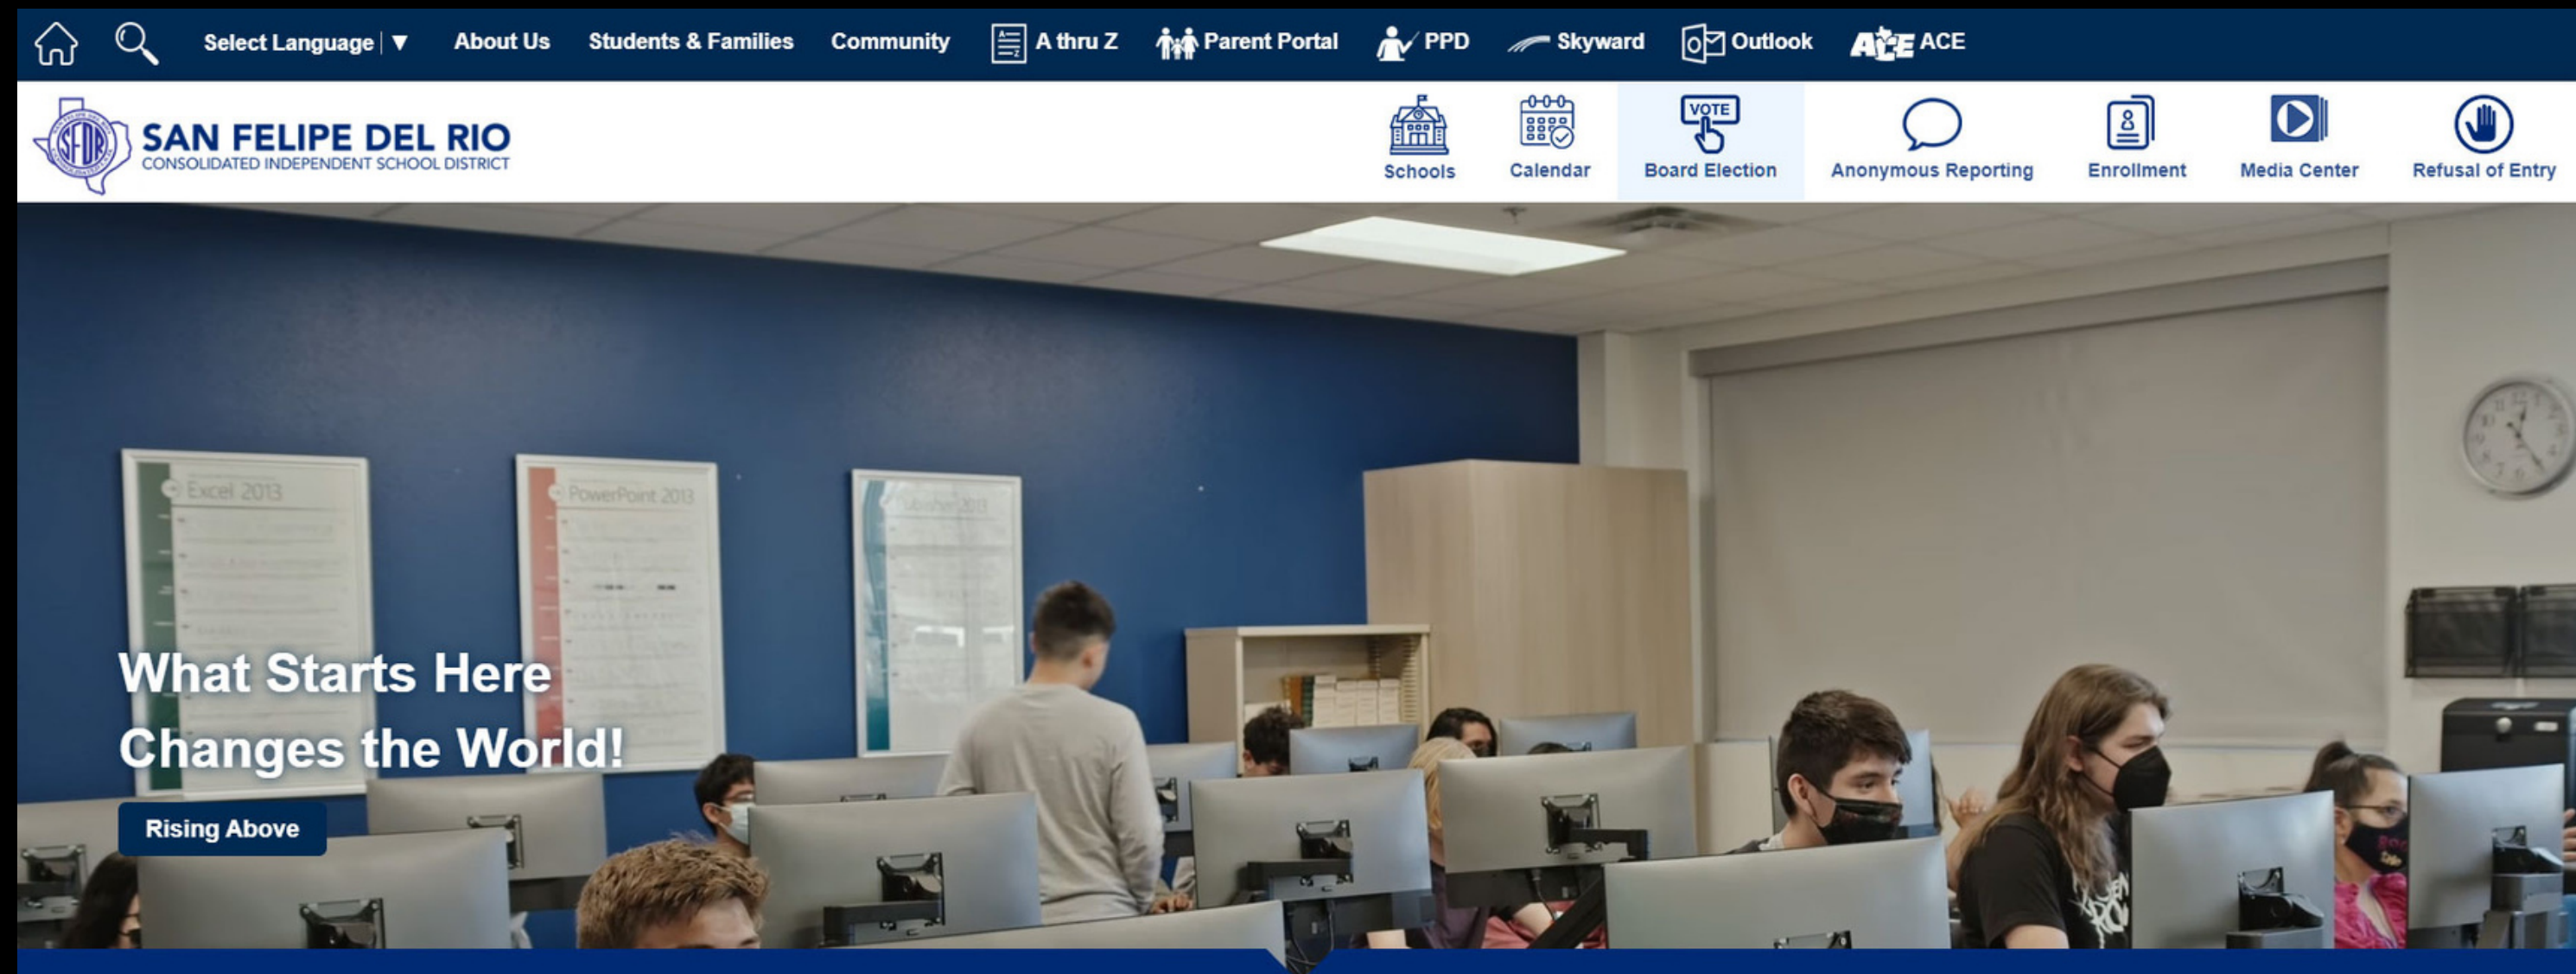

In 2009, Medixsoft Company was established with the aim of assisting clients in the education and healthcare sectors to enhance performance, navigate complex regulations, reduce costs, recover from distress, leverage technology, and drive growth. Our company works closely with clients to deliver sustainable and measurable results. We serve a diverse range of organizations, including leading academic institutions, healthcare organizations, Fortune 500 companies, and medium-sized businesses.

In 2022, Medixsoft underwent a rebranding process and emerged as eKohi Technologies, following the successful development of a series of educational software solutions tailored to address the specific challenges faced by school districts and universities. This expertise positions eKohi as the preferred choice for clients seeking tangible results.

Website & Schools Locator

Our Content Management System (CMS) based Websites are powered by the eKohi Technology platform. eKohi CMS offers peace of mind and has evolved with the following attributes:

- **Robust - Design & Performance**
- **Reliable**
- **Scalable**
- **Simple**
- **Extensible**
- **Powerful**

The San Felipe Del Rio CISD Board of Trustees is comprised of seven community members who are elected at-large for four-year terms. The SFDRCISD Board of Trustees functions within the legal parameters of the state and federal constitutions, statutes, courts, and administrative agencies. The Board is charged with the responsibility of providing the finest educational program possible for the students in the district. Trustees adopt a budget which is necessary to maintain and operate the schools, levy taxes to support the budget, and submit bond issues to the citizens of the district to finance construction projects.

School Board elections will be held on Saturday, May 4, 2024, for the following positions:

- Place II Currently held by Mr. Joshua D. Overfelt
- Place VI Currently held by Mrs. Diana Gonzales
- Place VII Currently held by Ms. Amy Haynes

In accordance with the election calendar set by the Texas Secretary of State, **the candidate filing period for the May 4, 2024 San Felipe Del Rio CISD School Board of Trustee Election begins Wednesday, January 17, 2024 at 8:00 a.m. The last day to file a completed application is Friday, February 16, 2024 at 5:00 p.m.**

2024 School Board Election Candidate Filings		
Place II	Place VI	Place VII
1. Joshua D. Overfelt (Incumbent)	1. Diana Gonzales (Incumbent)	1. Amy Haynes (Incumbent)
2.	2.	2.

Persons interested in becoming a candidate for the San Felipe Del Rio CISD School Board may pick up a packet in the Superintendent's office in the SFDRCISD Student Performance and Administration Building located at 315 Griner St, or may download an application electronically on this website. The candidate's packet contains instructions, an application, and forms required for filing.

To be eligible for, or elected or appointed to, the office of Trustee, a person must meet the eligibility requirements identified in accordance with Board Policy BBA(LEGAL). The location to file the applications is at the SFDRCISD Student Performance

Robust – Design & Performance

eKohi CMS, based in .NET, ensures that your websites have a solid design and high-performance capabilities. This means that your websites are visually appealing, user-friendly, and optimized for efficient loading and navigation.

To further enhance application performance, eKohi CMS supports a Load-Balanced environment, allowing for increased scalability and improved responsiveness.

eKohi CMS is hosted in the cloud, providing better service and faster access to your websites. Cloud hosting offers scalability, high availability, and redundancy, minimizing downtime and ensuring that your websites are consistently accessible to users.

One of the key strengths of eKohi CMS lies in its ability to handle varied content types, providing flexibility in managing different types of content effectively.

Additionally, eKohi CMS is built with responsive design, allowing your websites to adapt seamlessly to various device types and screen sizes, providing an optimal user experience.

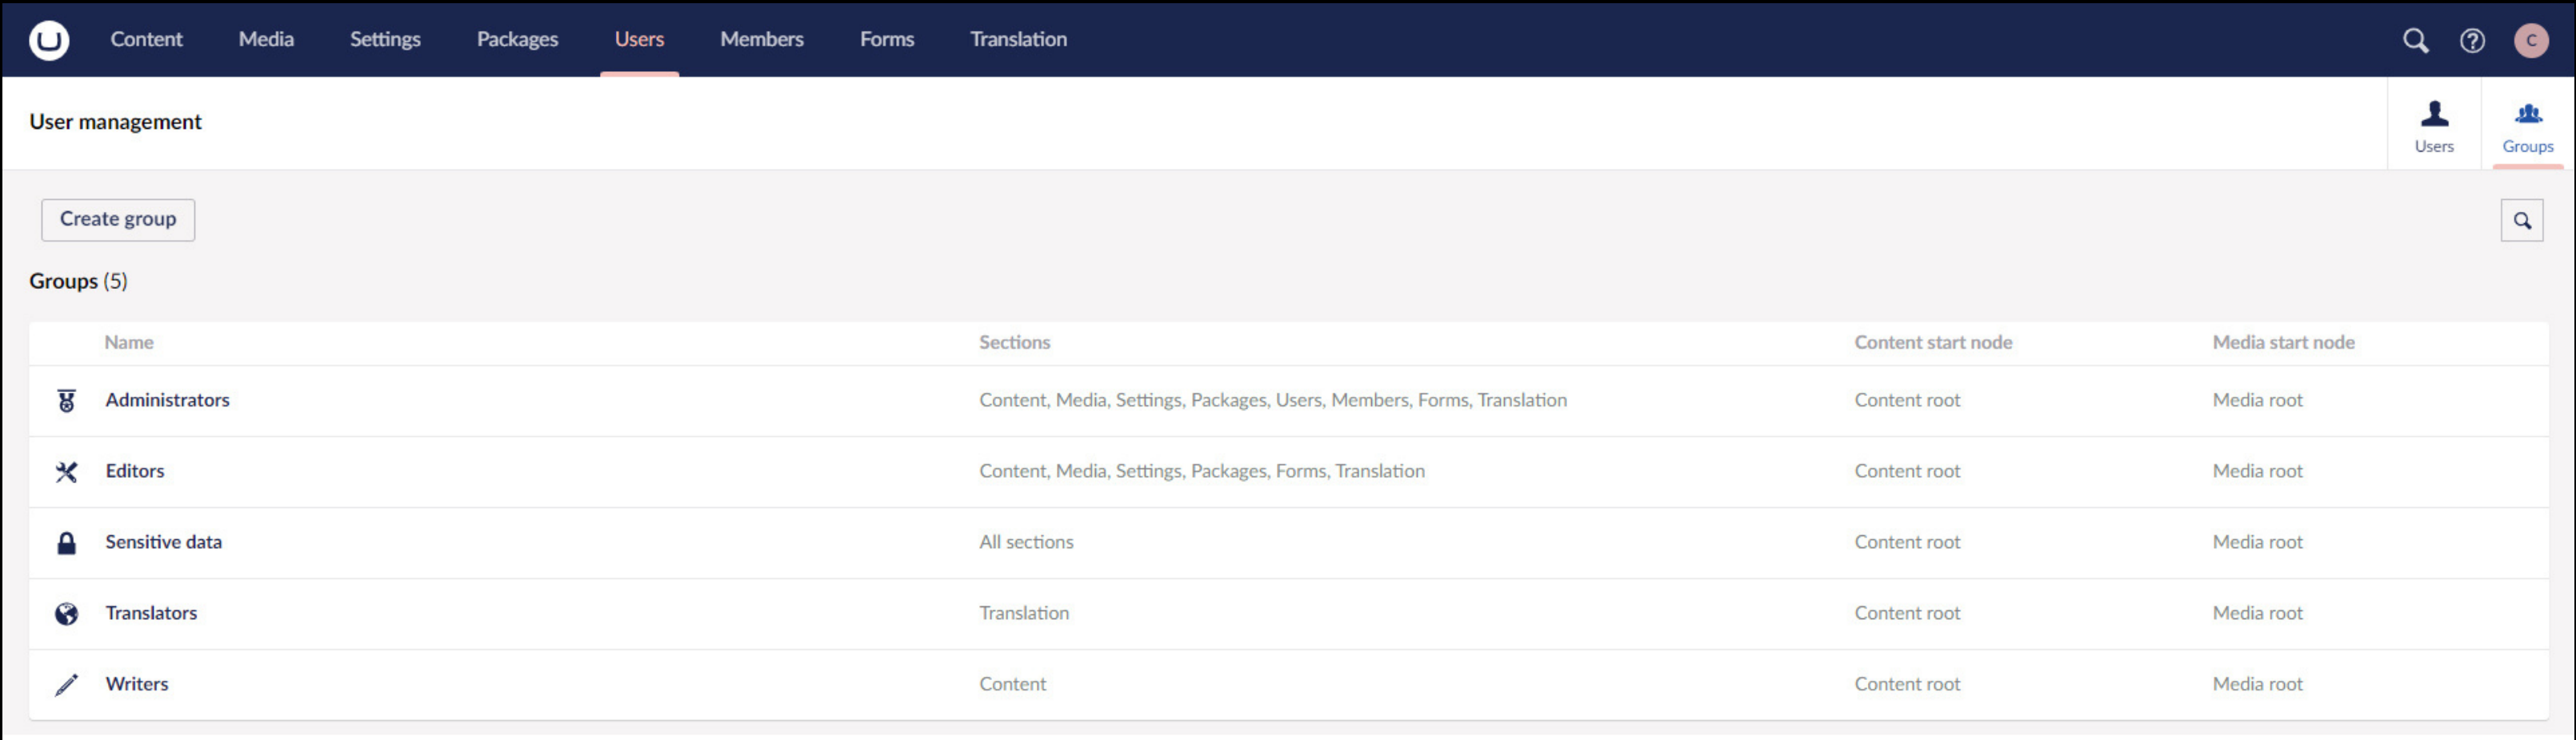

Reliable

eKohi CMS places great emphasis on reliability, recognizing its importance for any CMS. It offers a range of features and capabilities to ensure stability and consistent accessibility for your websites.

The screenshot displays the eKohi CMS user interface. The top navigation bar includes links for Content, Media, Settings, Packages, Users, Members, Forms, and Translation. The left sidebar shows a hierarchical menu with 'Content' expanded, revealing 'Home', 'SOLUTIONS', 'Products', and 'ABOUT US'. Under 'Products', 'Planning Protocol Dashb...' is selected. The main content area is titled 'Planning Protocol Dashboard' and contains a 'Banner Text' field with the value 'Planning Protocol Dashboards'. Below this is a 'Body' section with a 'Body Title' field (also containing 'Planning Protocol Dashboards') and a 'Body Description' field. The 'Body Description' field contains two paragraphs of text: 'The Planning Protocol Dashboards (PPD) empower school districts to seamlessly transition to 100% online resources, elevating the teacher experience to unparalleled heights while providing tailored Curriculum and Instructions (C&I) coding solutions. It is important to note that not all C&I planning protocol products are equal. It is the exceptional level of customization that sets eKohi-C&I Planning Protocol apart. Every aspect of the platform has been meticulously crafted with your needs in mind.' and 'The Planning Protocol Dashboards offer a comprehensive and adaptable solution, revolutionizing the way school districts approach online resources and curriculum planning. Here are the key features offered by PPD:'. Below the 'Body Description' field is a 'Body Content' section with a 'Service Item List' containing 'Yearly Documents' and 'Tile Management'. The bottom of the interface shows a breadcrumb trail: 'Home / SOLUTIONS / Products / Planning Protocol Dashb...' and three buttons: 'Save and preview', 'Save', and 'Save and publish'.

Out of the box, eKohi CMS offers a basic content approval workflow. This workflow allows for multiple stages of content review and approval, ensuring that content goes through the necessary checks before being published.

The CMS includes user and rights management functionality, allowing you to customize content view capabilities based on user roles and permissions. This offers enhanced security by ensuring that only authorized individuals can access and modify specific content.

The screenshot displays the 'User management' section of the eKohi CMS. At the top, a navigation bar includes links for Content, Media, Settings, Packages, Users (highlighted), Members, Forms, and Translation. Below the navigation bar, there's a 'Create group' button and a search icon. The main content area is titled 'Groups (5)' and contains a table with five rows, each representing a user group. The table has four columns: Name, Sections, Content start node, and Media start node. The groups listed are Administrators, Editors, Sensitive data, Translators, and Writers, each with specific permissions and start nodes.

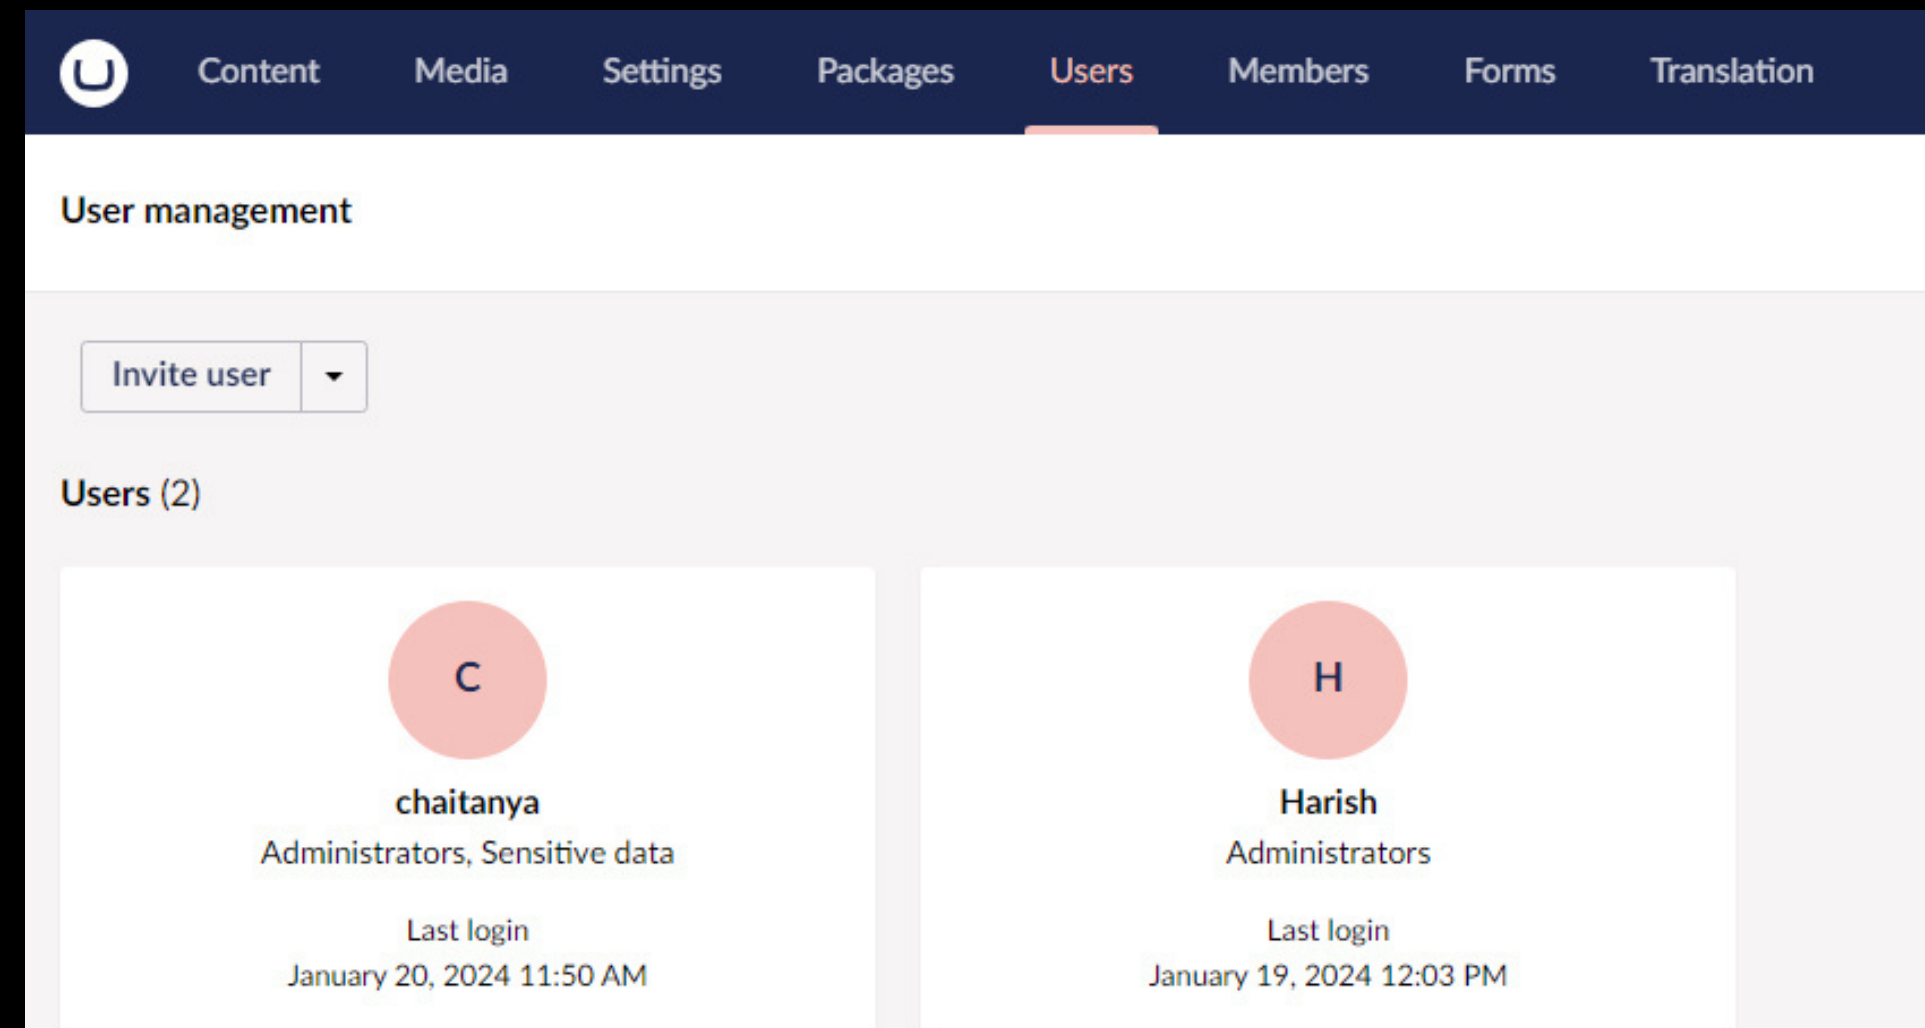

Name	Sections	Content start node	Media start node
 Administrators	Content, Media, Settings, Packages, Users, Members, Forms, Translation	Content root	Media root
 Editors	Content, Media, Settings, Packages, Forms, Translation	Content root	Media root
 Sensitive data	All sections	Content root	Media root
 Translators	Translation	Content root	Media root
 Writers	Content	Content root	Media root

Scalable

eKohi CMS recognizes the importance of scalability, particularly as your websites grow and attract more visitors or require additional functionality. It likely provides the necessary infrastructure and features to accommodate increased traffic and future expansion while maintaining optimal performance.

The architecture of eKohi CMS is designed to prioritize both scalability and performance. This means that as your websites experience higher levels of traffic, the underlying infrastructure can handle the increased load without sacrificing speed or responsiveness.

The CMS utilizes Elastic Beanstalk, which is configured to automatically scale up and down the web servers based on network traffic. This ensures that your websites can dynamically adjust to accommodate fluctuating levels of visitors, ensuring a smooth user experience even during peak periods.

Simple

eKohi CMS understands the importance of simplicity in a content management system, enabling users to manage and update their websites with ease. It likely offers an intuitive user interface and straightforward workflows, allowing users to efficiently create and modify content without requiring extensive technical knowledge.

eKohi CMS likely provides simple content types that facilitate content creation. These predefined content types make it easy for users to create various types of content, such as articles, blog posts, or product pages, without the need for complex configurations.

eKohi CMS likely offers easy content creation and update capabilities, allowing users to quickly compose and modify content within the CMS. This streamlined process eliminates unnecessary steps and reduces the time and effort required to publish or modify website content.

eKohi CMS provides an easy-to-use content navigation system, allowing users to navigate through different sections, pages, or content types seamlessly. This ensures that users can quickly find and access the content they need for editing or updating purposes.

Extensible

eKohi CMS likely provides extensible back-office dashboards, sections, and trees. This means that you can customize the layout and organization of the back-office interface to match your specific requirements, providing a personalized and efficient user experience.

eKohi CMS allows for customizations at various levels, including content, application, and infrastructure. This flexibility enables you to modify and adapt the CMS to meet your specific needs, whether it's customizing the content structure, adding new features to the application, or integrating with different infrastructure components.

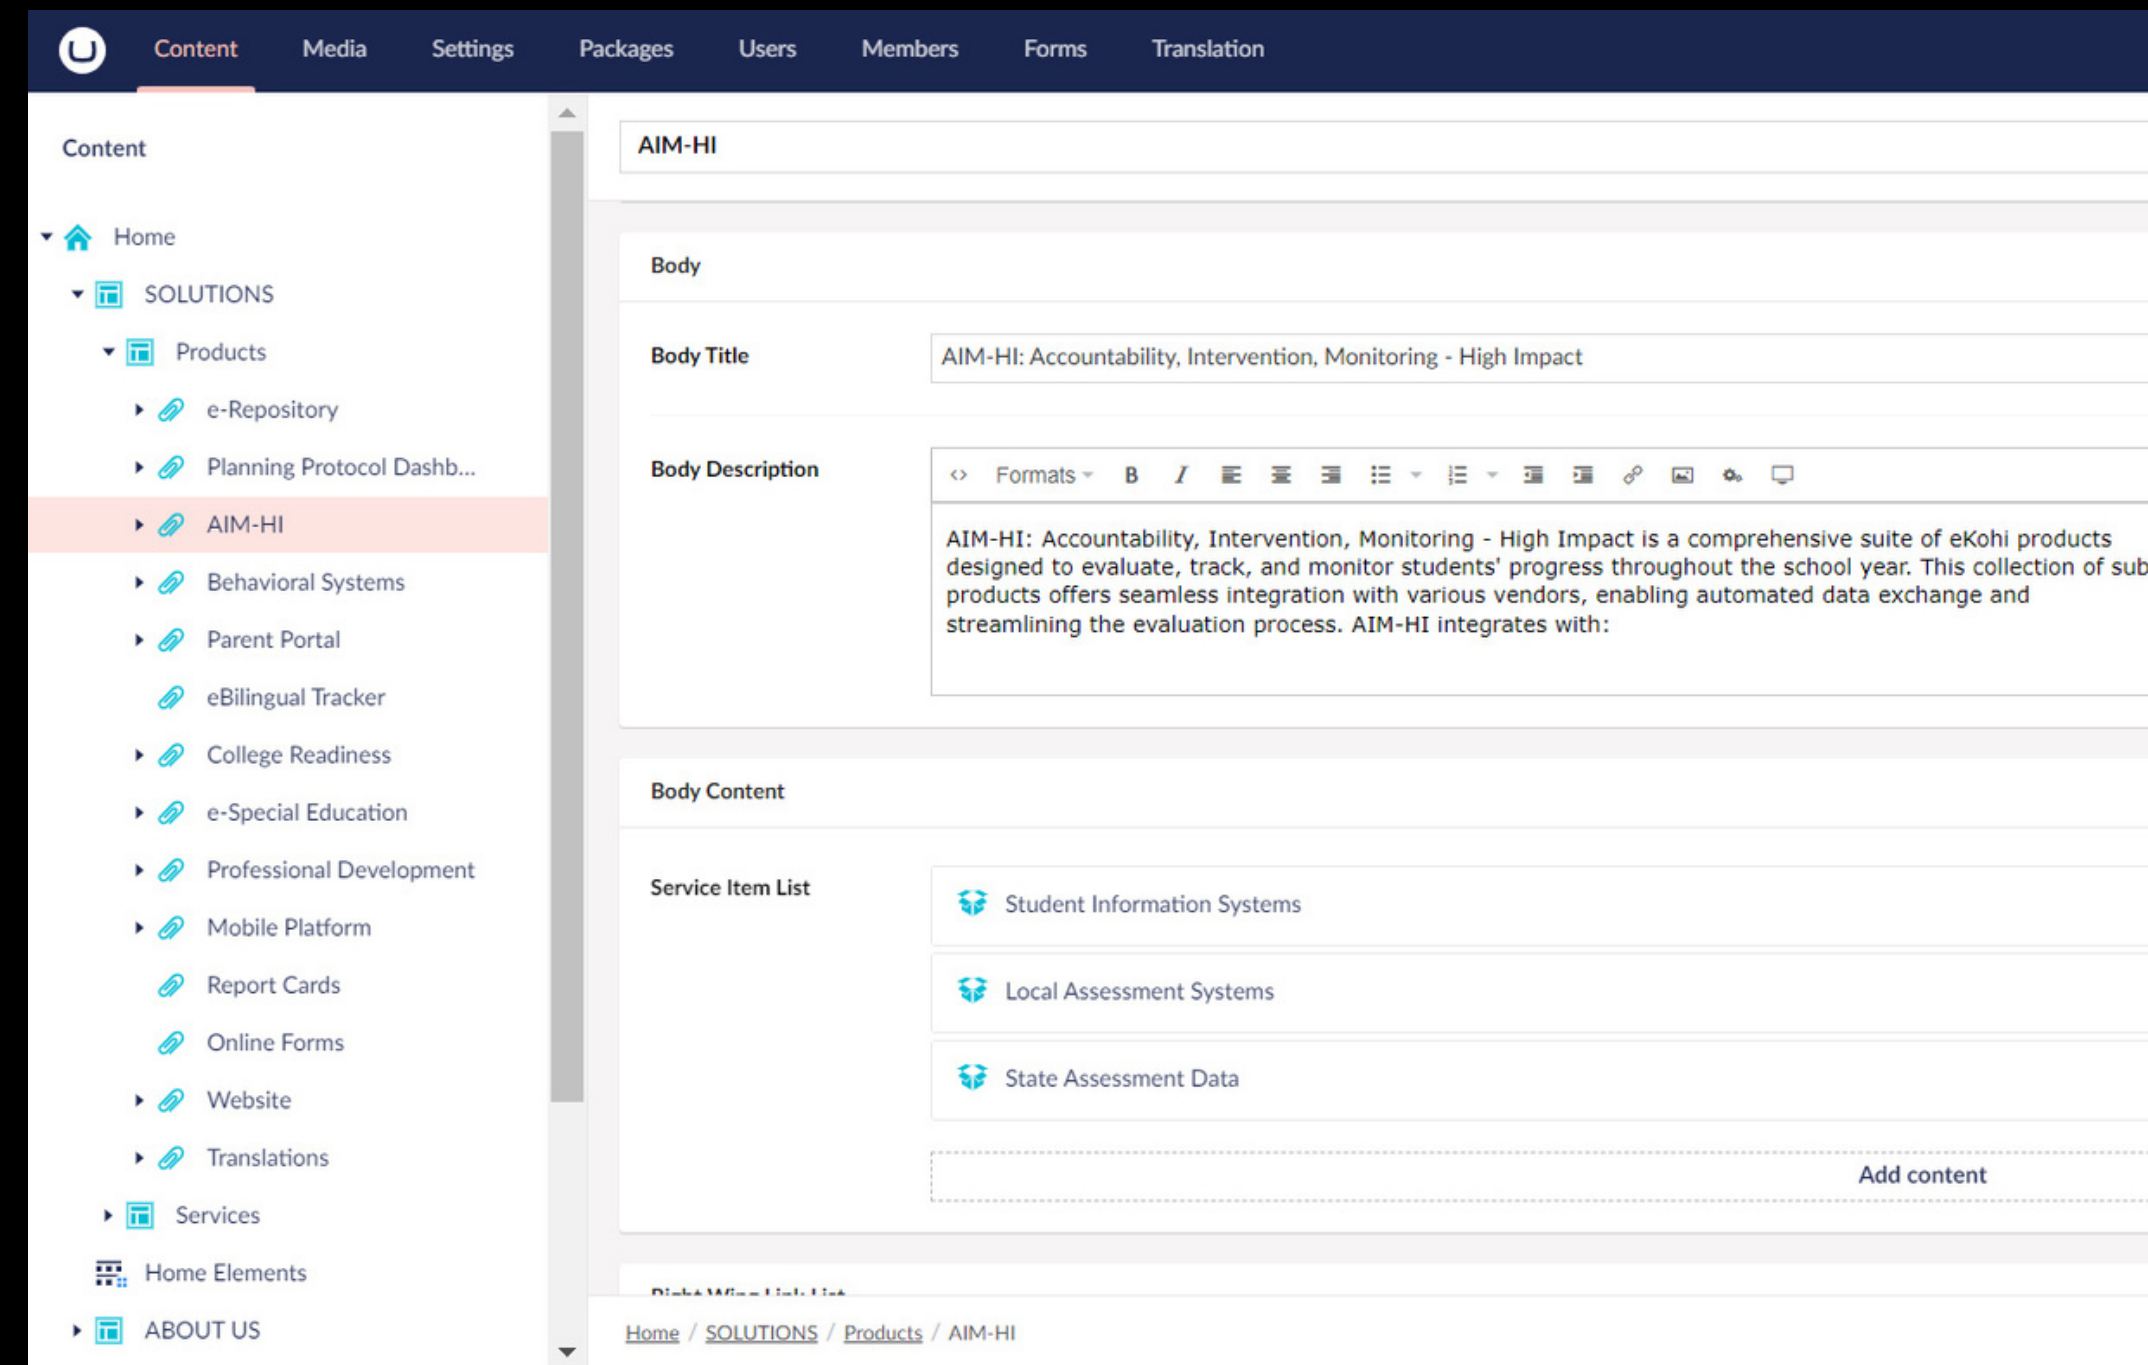

eKohi CMS likely offers multi-language capability, allowing you to serve your websites to a wide array of audiences. This feature enables you to create and manage content in multiple languages, ensuring that your websites can effectively reach and engage users across different regions or language preferences.

Powerful

eKohi CMS is likely designed to comply with the WCAG 2.0 standards with AAA gradation. This empowers accessibility-challenged users by ensuring that your websites are accessible and provide a positive user experience for individuals with disabilities.

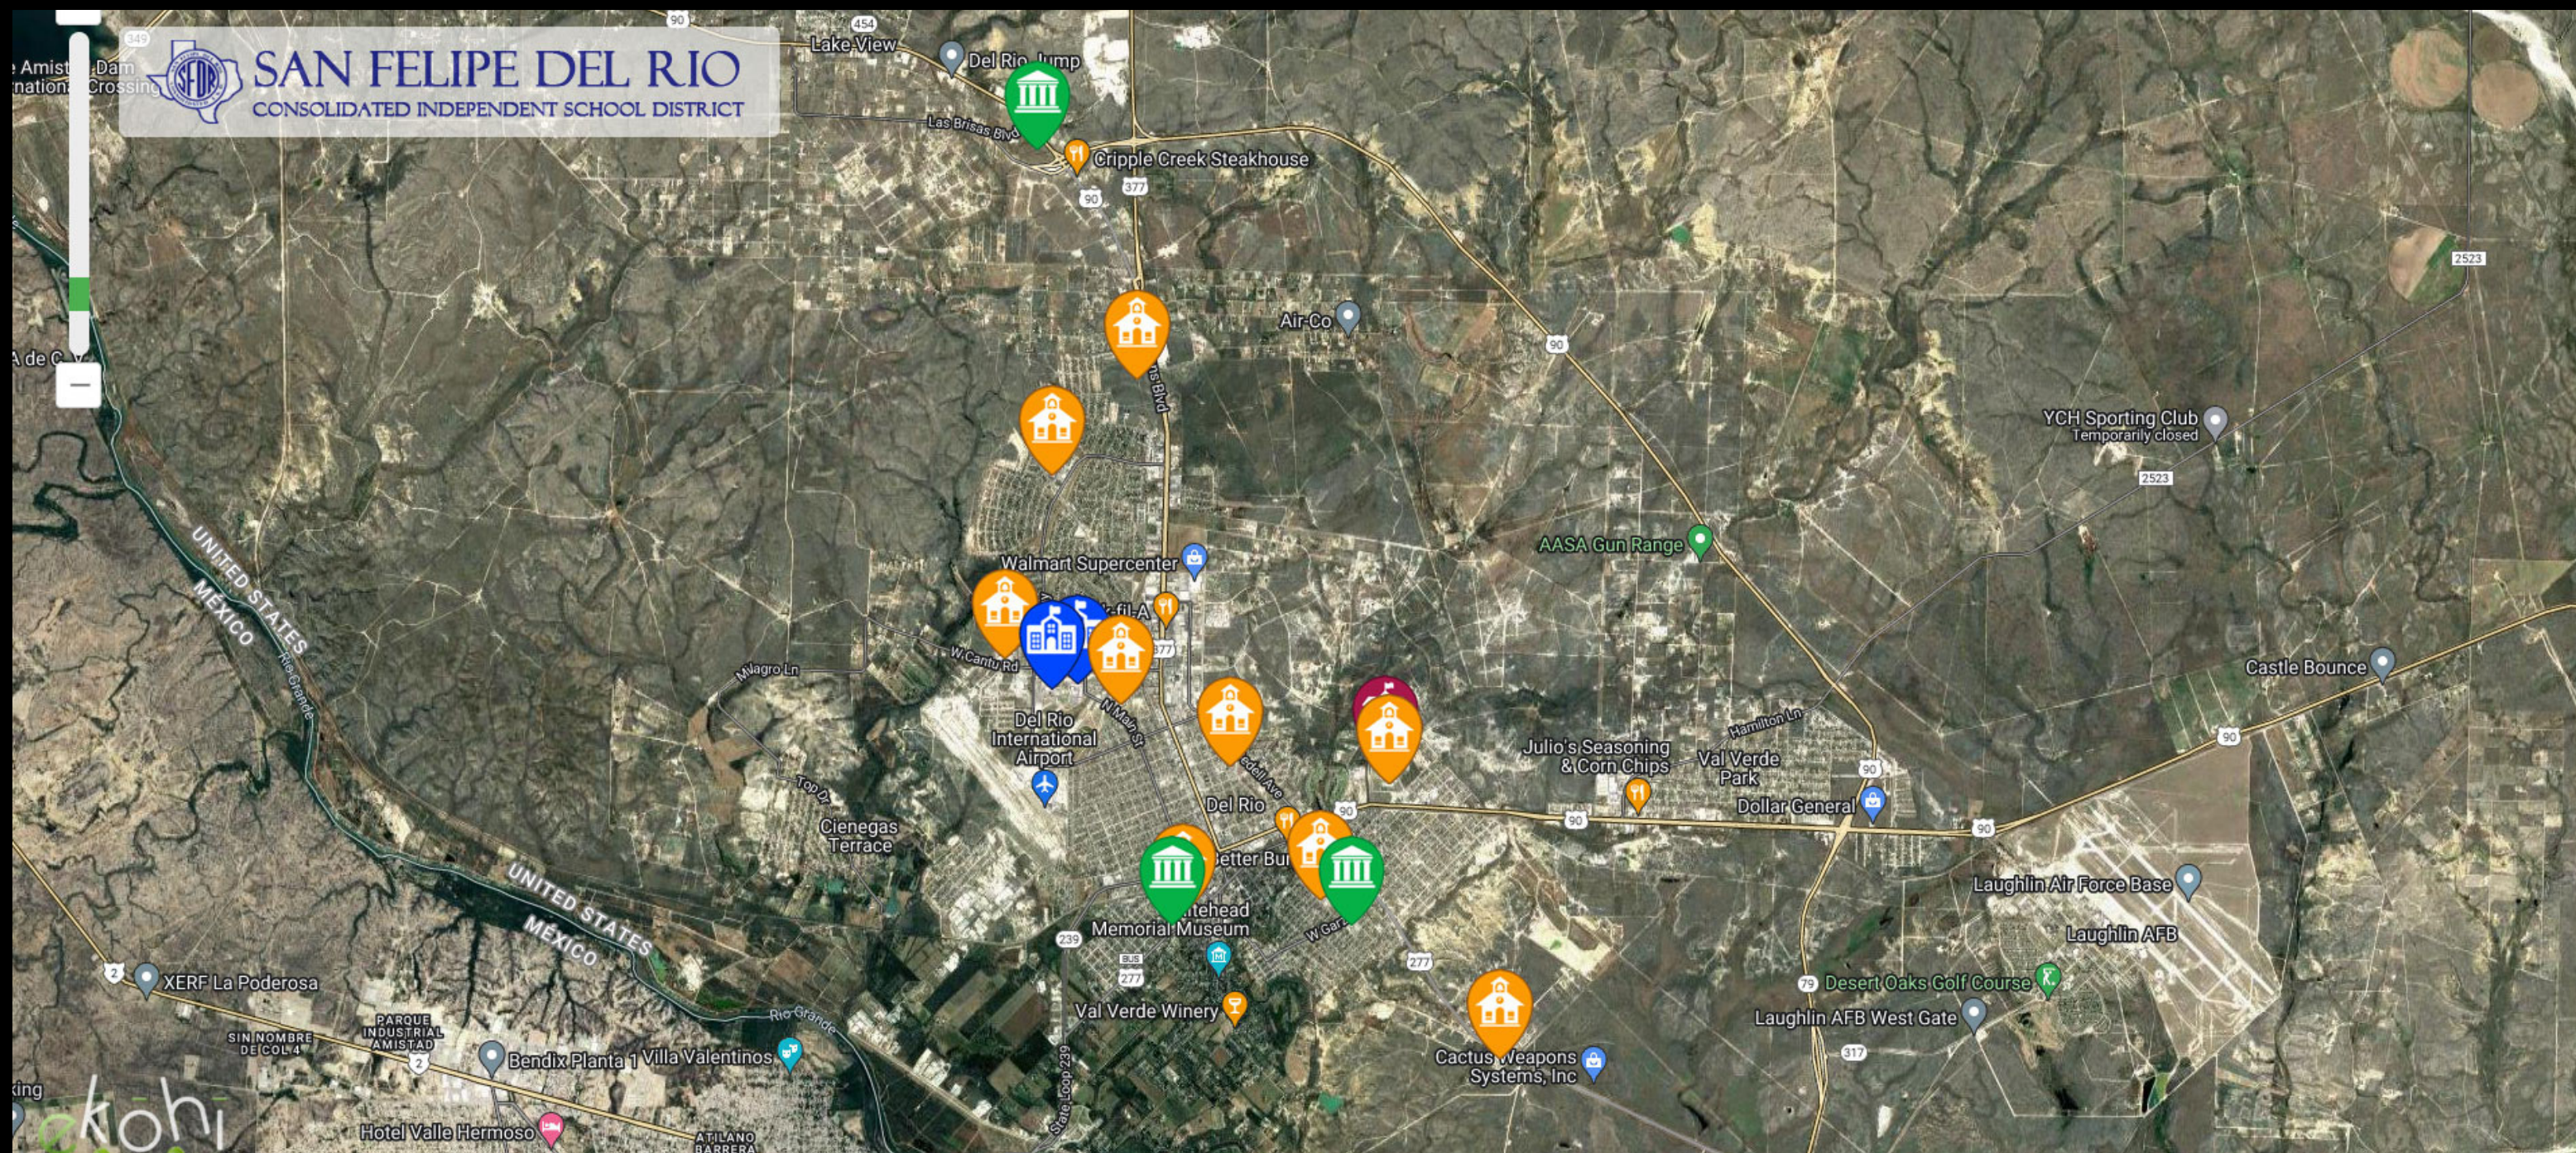

eKohi CMS provides customizable membership options, enabling you to define and manage different levels of user access and permissions. This allows you to control and customize the user experience based on membership levels or user roles.

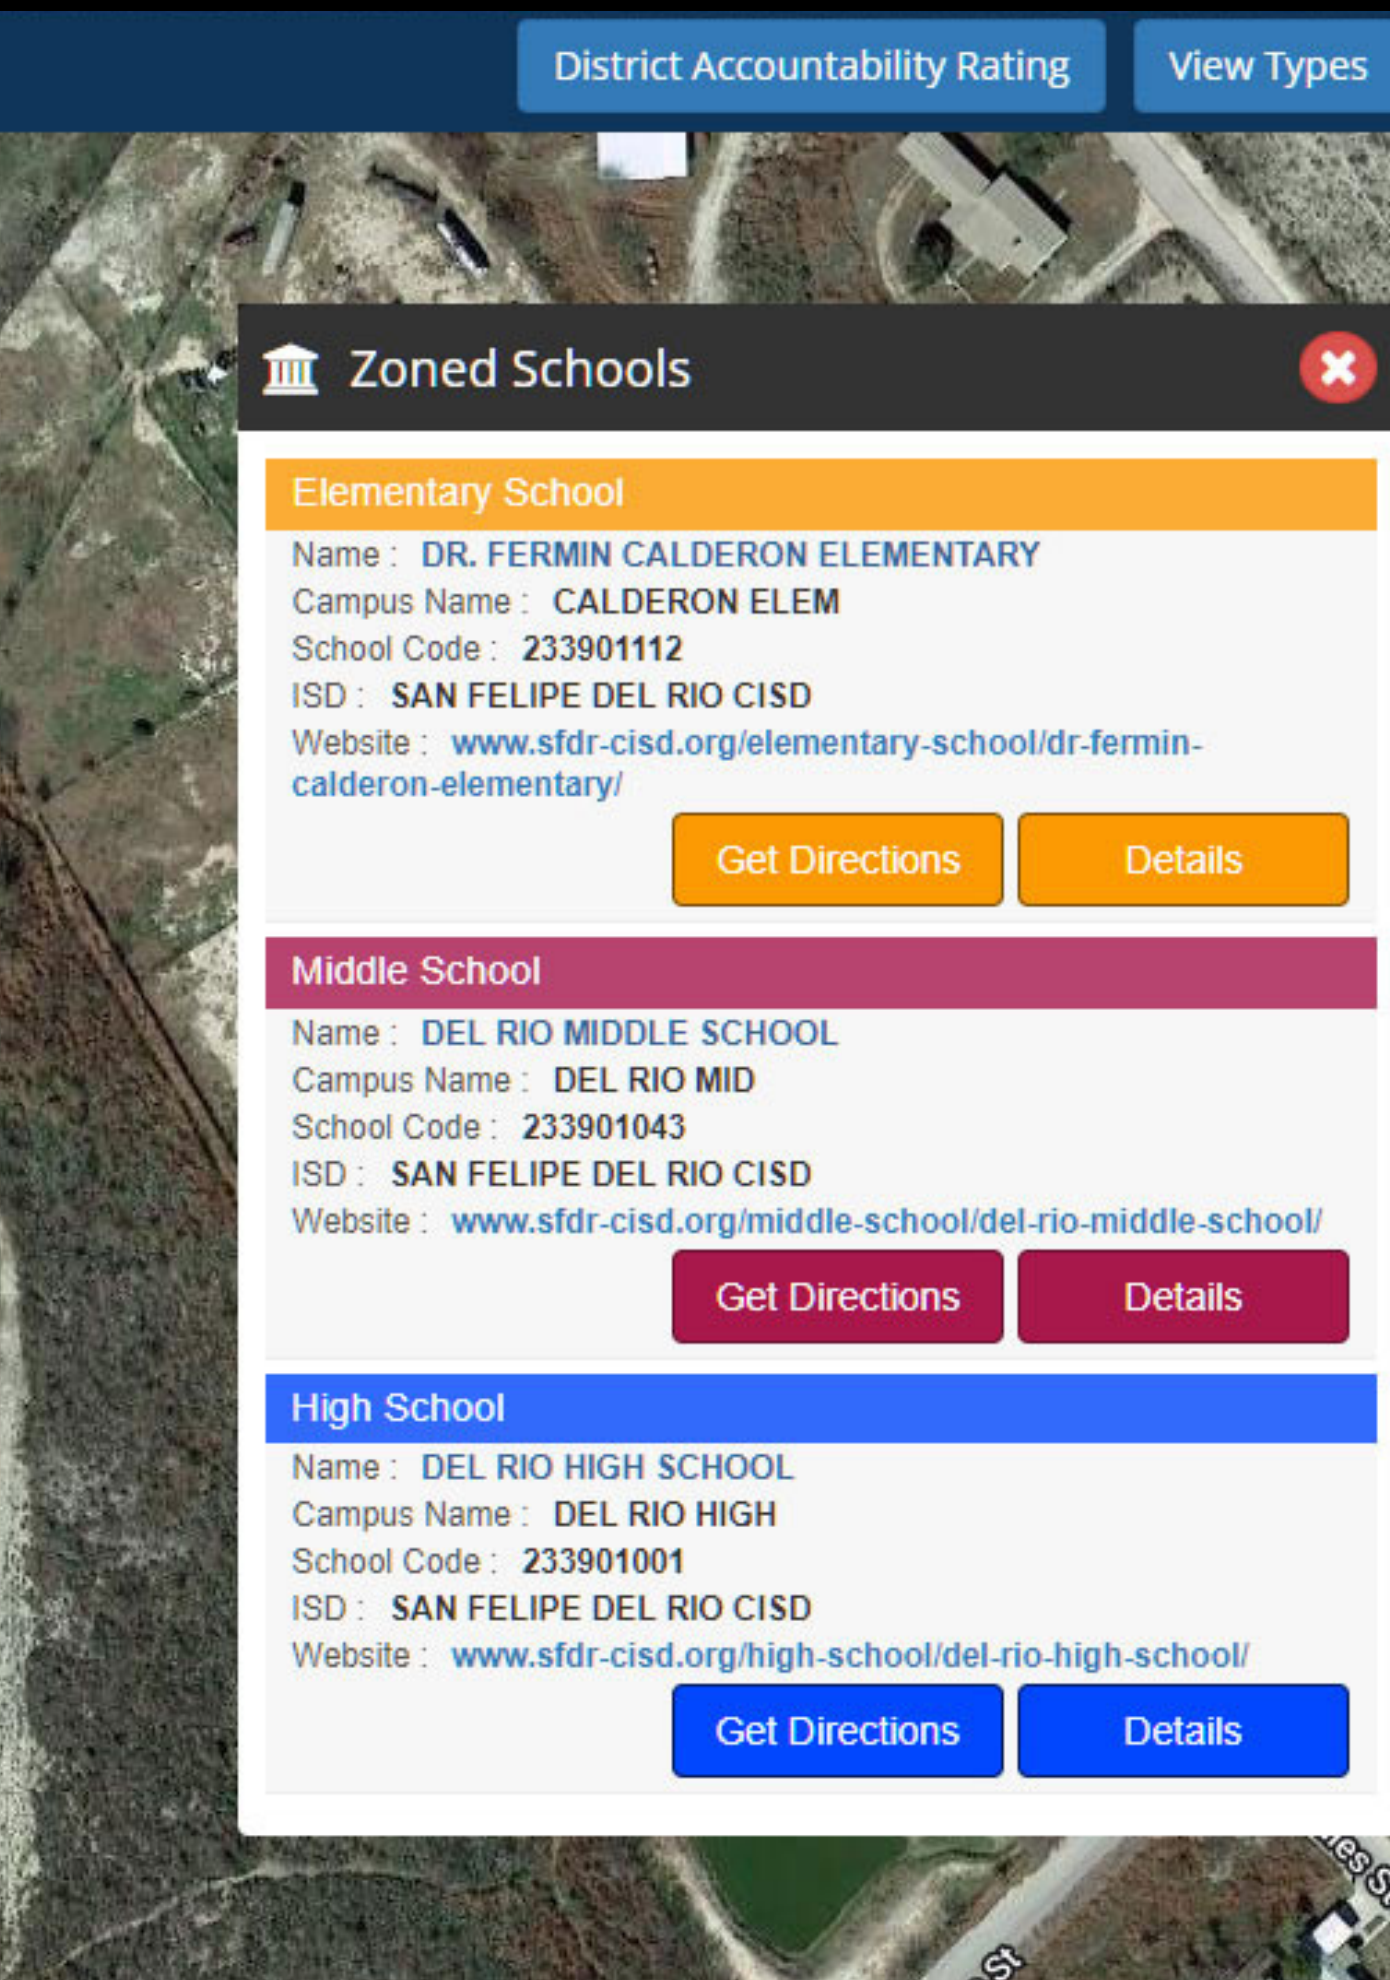

eKohi CMS likely offers administrative options that fortify content security. These options may include user authentication, secure login mechanisms, and other security measures to protect your content and sensitive data.

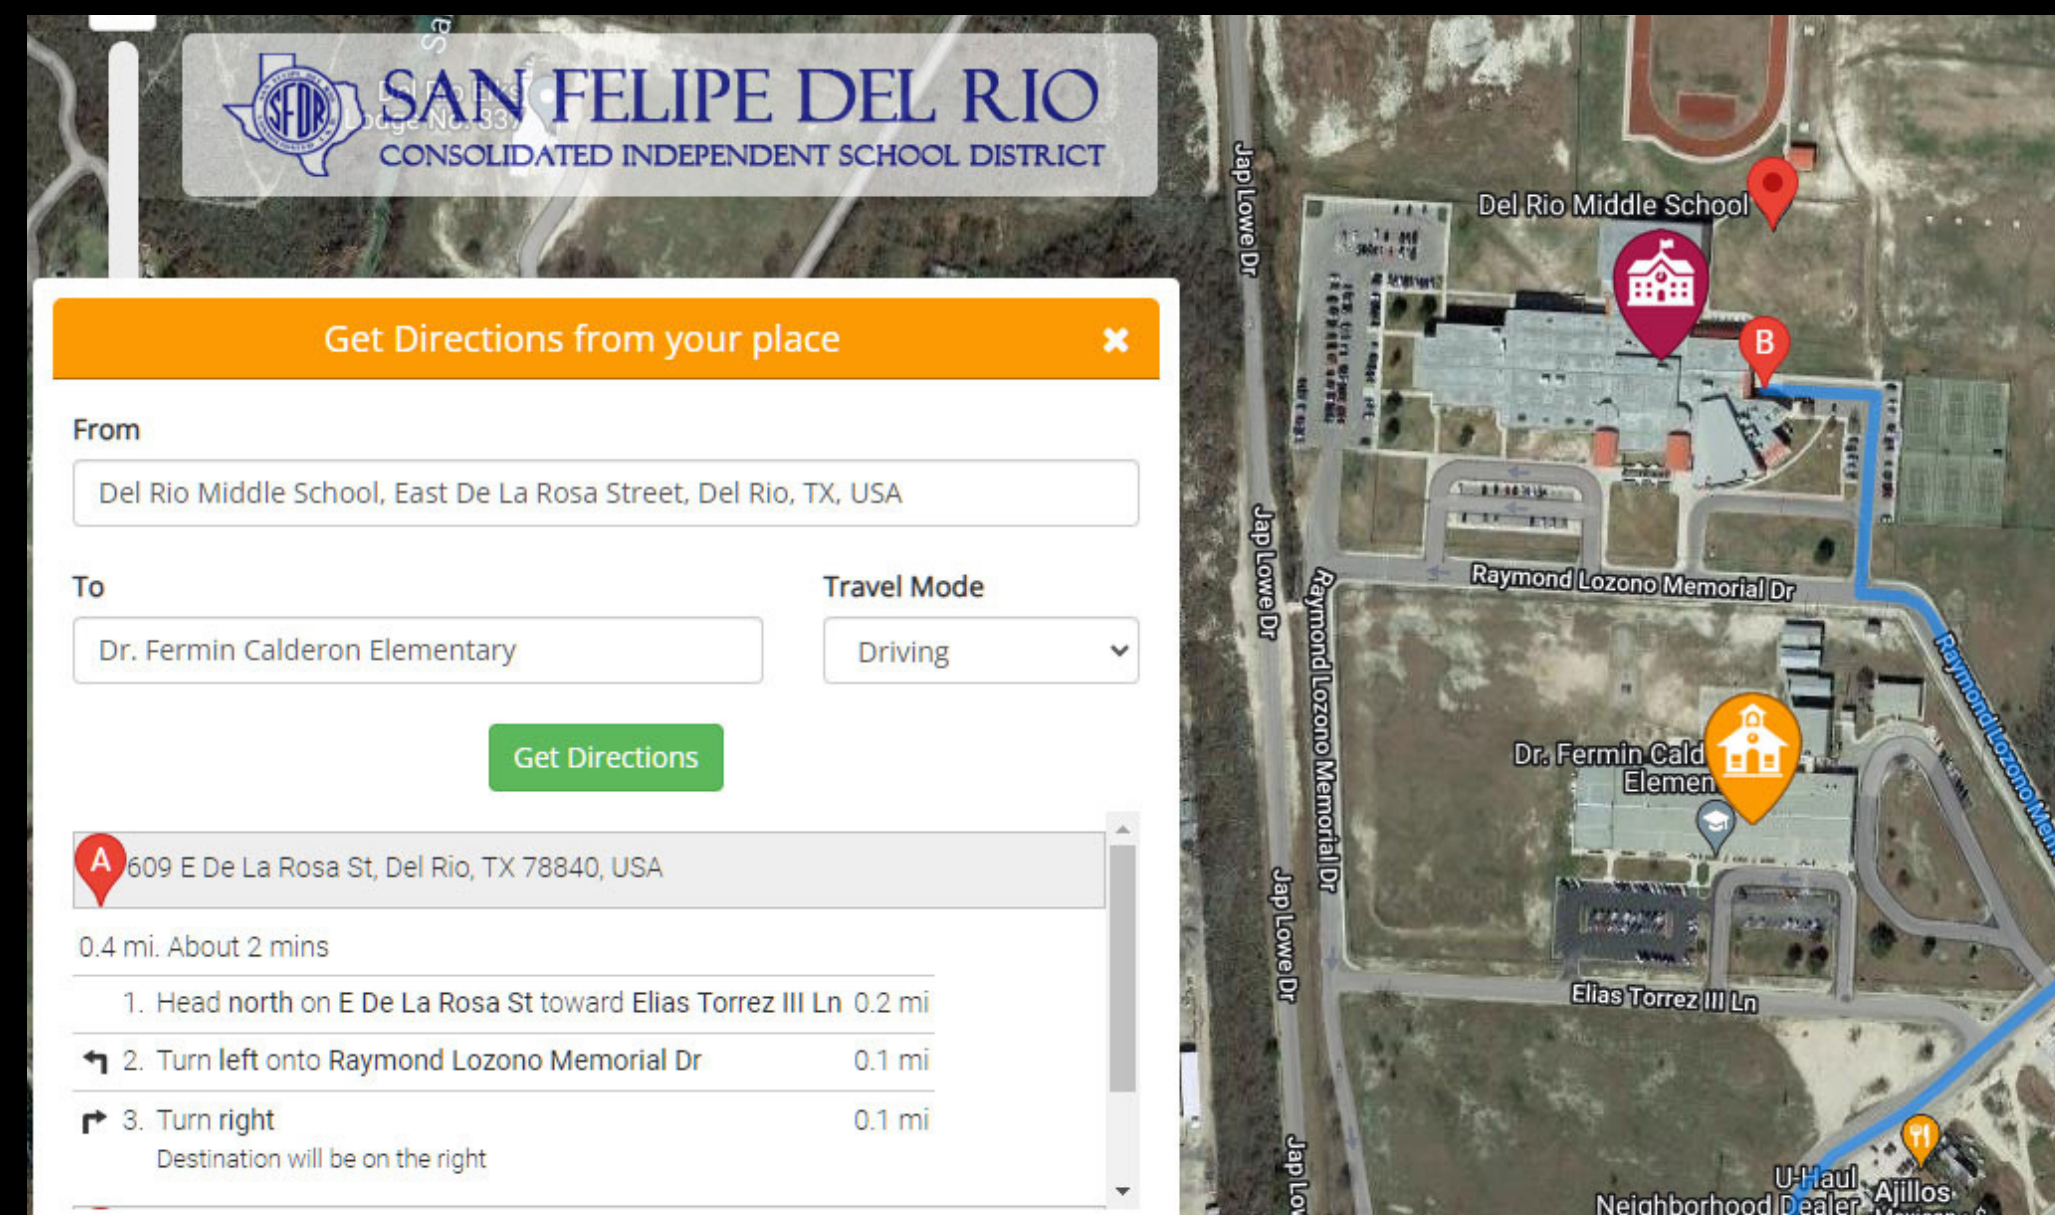

School Locator

The School Locator is an interactive tool designed to provide parents and students with the ability to view their location within the attendance zones of the school district. It offers a convenient way for parents interested in moving to the district to determine which school their child will be attending.

The School Locator tool is fully integrated with Google Maps through Google Geocode. This integration allows users to input their address, and the tool will directly map their location to the zoned schools, including elementary, middle, and high schools. Users can easily visualize the proximity of their address to each school.

School Locator

In addition to mapping the address, the School Locator provides detailed information about each school. This includes the current principal's name, the school's address, website, school code, and the grade levels offered, including both lower and upper grade levels. Users can also find information about student enrollment numbers, the School Accountability rating, school report card, and school accountability performance report. These details help parents and students gain a comprehensive understanding of each school's profile and performance.
